ARE YOU YOUR BODY?

God forbid some terrible accident befell you and you lost your arms, legs, eyes, and every organ that was not necessary for you to stay alive, would you still be you?

You are not your body. You are the spirit that animates your body.

Life to a tissue or an organ comes from the nerves. Cut a nerve to a tooth and it dies. When the nerve supply to an arm is cut off it becomes lifeless. Compress a nerve to an organ and it slowly dies because it has many nerves.

The power which flows over the nerves is the power that you yourself are. The power that made the body. The power that heals the body. The power that caused you to be. Nature created you.

A subluxation is a point of structural interference to the flow of a nerve, the flow of life, the power supply. A subluxation is a point of separation between you and what nature intended of you and a "house divided will fall".

When an adjustment is made and the nerve is released, the flow of creative LIFE goes back into your body and restores you into an unlimited being, your Nature-given potential.

You are the spirit. You are the Power. Not all of the Power but the piece that Nature gave you, you are. Use it all. Use it wisely.

No matter what problems come against you they can not have YOU. Now the only limitation can be in your mind.

Argue for your limitations and they are yours!
