## **BEWARE OF SNAKE OIL PEDDLERS AND WOLVES IN SHEEPS CLOTHING**

"I tell you the only way to get into the sheep pen is through the gate.

Those that climb over the gate are robbers and thieves. " .

- John 10:1

Science: Belief found through experimentation

Religion: Belief in divinity through faith

In 1935 when a famous scientist was asked the question, "Do you believe in God?" The answer was "Of course not, I am a scientist!"

In 1999 when a famous scientist was asked the same question, "Do you believe in God?" The answer was "Of course I do, I am a scientist!"

Much of medicine is based strictly on science. The addition of drugs or the subtraction of an organ goes against all laws of nature. Once you have re-arranged, re-organized or removed anything in nature, you have disturbed the order of God and must pay the consequences. Take out the gall bladder or tonsils, put in steroids, aspirin, or antibiotics and there will be devastating long term effects. May God have mercy on the one who has forced his hand. If the surgeon saves the patient, he/she is a great surgeon. If it doesn't look like the patient is going to make it, "It's in God's hands now."

Much of "natural healing" is based strictly on philosophy and religious beliefs. Herbal, vitamin, mineral and home remedies, and "alternative healers" often have no scientific basis at all.

Chiropractic is the only health care profession designed to maximize the natural God given strengths of the human body and its ability to heal itself without the use of drugs or surgery. It is based on the scientific fact that every function of the body and all healing is under direct and total control of the nerve system. However, it is also based on the fact that God himself designed us, and His power and intelligence are our master within. That God needs no help to keep us well just no interference. . . Chiropractic seeks only to remove this interference.

**Our purpose is to educate and adjust families toward optimal health  
with natural chiropractic care.**
