Body by Nature

Nature's Law

There is a law at work in every human body that if we are functioning according to the way nature planned and designed, our tendency is to be well.

If we are sick, we must simply get the body back to functioning within the confines of the law so that nature's principle can go back to work and we may be well again.

If we are functioning poorly, then we are working outside of nature's law, and disaster and disease are inevitable.

Subluxations interfere with the natural function of the human body

Today's subluxation is tomorrow's disease

THE POWER THAT MADE THE BODY HEALS THE BODY.

And it doesn't happen any other way.

"Each patient carries his own best doctor inside him. They come to us not knowing the truth. We are at our best when we give the doctor who resides within each patient a chance to work. "

- Albert Schweitzer, MD

**Our purpose is to educate and adjust families toward optimal health
