Dr. Roger Sperry, 1980 Nobel Prize recipient for brain research, has demonstrated that ninety percent (90%) of the energy output of the brain is used in relating the physical body to gravity. Only ten percent (10%) has to do with thinking, metabolism, and healing.

"SUBLUXATION robs the body of focus to think, organization to metabolize, and power to heal"

" The condition of subluxation by itself is a lowered state of physical and mental well being and requires no other justification for its detection and correction."

"Only one ninth of the nervous system carries or perceived pain. Subluxation always sets the alarm-time, but frequently neglects setting of the alarm. Only through proper education and understanding will our patients be able to reach their maximum potential."

"Gray's Anatomy clearly shows how spinal muscles leave greatest pivotal at C1, C4-C5, T6-T7, L3, & S2 for the most strength and potential energy. This implies there must be lateral curves for peak performance."

"Loss of any lateral curve dimension radically affects spinal strength and automatically increases muscle output at rest."

" Alfred Breig , leading neuro-surgeon has shown that loss of curve stretches the spinal cord 5 to 7 cm. and produces pathological tension. A Military Neck is a state of DIS-EASE."

**Our purpose is to educate and adjust families toward optimal health
with natural chiropractic care.**
